DEFINITIONS:

*** DEFINITION OF MONOCHROME PHOTOGRAPHY:**

An image is considered to be Monochrome only if it gives the impression of having no colour (i.e. contains only shades of grey which can include pure black and pure white) OR it gives the impression of being a grayscale image that has been toned in one colour across the entire image. (For example by Sepia, red, gold, etc.)

A grayscale or multi-coloured image modified or giving the impression of having been modified by partial toning, multi toning or by the inclusion of spot colouring does not meet the definition of monochrome and shall be classified as a Colour Work.

**** DEFINITION OF PHOTO TRAVEL**

A Photo Travel image expresses the characteristic features or culture of a land as they are found naturally. There are no geographic limitations.

Images from events or activities arranged specifically for photography, or of subjects directed or hired for photography are not appropriate. Close up pictures of people or objects must include features that provide information about the environment. Techniques that add, relocate, replace or remove any element of the original image, except by cropping, are not permitted. The only allowable adjustments are removal of dust or digital noise, restoration of the appearance of the original scene, and complete conversion to greyscale monochrome. Other derivations, including infrared, are not permitted. All allowed adjustments must appear natural.
